

Position: 1

Role: Sr. Core Java Developer

Location: Alpharetta, GA/ NYC/ Charlotte, NC - Hybrid (only Local)

Exp: 10+.

Strong Java back-end developer with Kafka experience.

Software Requirements:

- Proficiency in Java programming language
- Knowledge of Java frameworks such as Spring, Hibernate, and Struts
- Familiarity with Java development tools such as Eclipse, IntelliJ IDEA, and NetBeans
- Knowledge of databases such as MySQL, Oracle, and SQL Server

Overall Responsibilities:

- Develop, test, and maintain high-quality Java applications
- Work with a cross-functional team to develop solutions that meet the business needs
- Write clean, maintainable, and efficient code
- Debug and resolve technical issues in a timely manner
- Stay up-to-date with the latest advancements in Java technology

Skills:

- Strong programming skills in Java
- Excellent knowledge of OOP concepts
- Strong problem-solving and critical thinking skills
- Familiarity with Agile software development methodologies
- Excellent written and verbal communication skills

Experience:

- At least 9+ years of experience in Java development
- Experience working with Java frameworks and tools
- Experience with database design and management
- Experience working in a team environment

Position: 2

Role: Senior Python Developer (Capital Markets & DataBricks/ Kafka)

Location: Iselin, NJ

Exp: 10+ years

Experience:

- Minimum of 10+ years of experience in technology consulting, with a focus on new and emerging technologies.
- Understanding of software development lifecycle, methodologies, and technologies.

Relevant Experience:

- Hands-on experience with cutting-edge technologies such as blockchain, IoT, machine learning, AI, and others.
- Experience in delivering technology solutions to clients and ability to understand their business requirements.

Summary:

As a Consultant in Other Technologies, you will be responsible for helping clients in adopting new and emerging technologies to meet their business needs.

Key Skills:

- Strong analytical and problem-solving skills.
- Excellent verbal and written communication skills.
- Ability to work in a fast-paced and dynamic environment.
- Strong technical knowledge of new and emerging technologies.

Requirements:

- Bachelor's or Master's degree in Computer Science, Engineering or a related field.
- Experience with agile software development methodologies.

Responsibilities:

- Conduct research and analysis of new and emerging technologies to identify their potential for client solutions.
- Work closely with clients to understand their business requirements and provide recommendations for technology solutions.
- Participate in the design, development, and implementation of technology solutions.
- Stay up-to-date with the latest advancements in new and emerging technologies and share knowledge with team members.
- Collaborate with cross-functional teams and ensure project deliverables are completed on time and within budget.

Position: 3

Role: Senior Data Engineer (Risk / Financial Domain)

Location: Iselin, NJ

Exp: 12+ years

Job Description:

- We are seeking a highly skilled and experienced IT developer to join our dynamic Credit Risk Capital IT team within Credit Risk Technology Group. As a Senior IT Developer, you will play a crucial role in designing, implementing, and maintaining the application and infrastructure for Credit Risk Capital applications following regulations like SACCR, CEM etc

Responsibilities:

- Understand technical specifications
- Business requirements discussion with business analyst and business users
- Python/SQL Server/Snowflake/Databricks application development and system design
- Develop and maintain data models and schemas to support data integration and analysis.
- Implement data quality and validation checks to ensure accuracy and consistency of data.
- Execution of UT and SIT with business analysts to ensure of high-quality testing
- Support for UAT with business users
- Production support and maintenance of application platform

General:

- Around 12 years IT industry experience
- Strong communication skills
- Agile methodology and SDLC processes
- Design and Architecture experience
- Experience working in global delivery model (onshore/offshore/nearshore)
- Strong problem-solving and analytical skills
- Self-starter, collaborative team player and works with minimal guidance

Technical Skills:

Mandatory (Strong)

- Python, SQL server and relational database concepts, Azure Databricks, Snowflake, Scheduler (Autosys/Control-M), ETL, CI/CD

Plus:

- PySpark
- Financial systems/capital markets/credit risk/regulatory application development experience

Position: 4

Role: Azure Data Architect

Location: Iselin, NJ

Exp: 12+ years

Our Challenge:

- We are seeking an experienced Azure Data Architect to design and implement scalable, secure, and efficient data solutions on Azure Cloud for our financial services client. The architect will lead the development of data platforms using Azure services and Databricks, ensuring robust data architecture that supports business objectives and regulatory compliance.

Responsibilities:

- Design and develop end-to-end data architecture on Azure Cloud, including data ingestion, storage, processing, and analytics solutions.
- Lead the deployment of Databricks environments and integrate them seamlessly with other Azure services.
- Collaborate with stakeholders to gather requirements and translate them into architectural designs.
- Ensure data security, privacy, and compliance standards are met within the architecture.
- Optimize data workflows and pipelines for performance and cost-efficiency.
- Provide technical guidance and mentorship to development teams.
- Keep abreast of the latest Azure and Databricks technologies and incorporate best practices.

Must Have:

- Extensive experience designing and implementing data architectures on Azure Cloud.
- Deep understanding of Databricks platform and its integration with Azure services.
- Strong knowledge of data warehousing, data lakes, and real-time streaming solutions.
- Proficiency in SQL, Python, Scala, or Spark.
- Experience with Azure Data Factory, Azure Data Lake, Azure SQL, and Azure Synapse Analytics.

- Solid understanding of security, governance, and compliance in cloud data solutions.

Nice to Have:

- Experience working in the financial services domain.
- Knowledge of machine learning and AI integration within data platforms.
- Familiarity with other cloud platforms like AWS or GCP.
- Certifications such as Azure Solutions Architect Expert, Azure Data Engineer, or Databricks Certification.

Certifications:

- Azure Solutions Architect Expert
- Azure Data Engineer Associate
- Databricks Certification (Certified Data Engineer or similar)

Domain: Financial Services

Position: 5

Role: Senior Data Engineer (MDM Experience)

Location: Iselin, NJ

Exp: 12+ years

Introduction:

- We are seeking a seasoned Senior Data Engineer with extensive experience in MDM implementations, preferably within the financial services or investment banking sector. The ideal candidate will have a proven track record of architecting end-to-end MDM solutions, evaluating various platforms, and ensuring data integrity across complex reference data domains.

Key Responsibilities:

- Lead the design, development, and implementation of end-to-end Master Data Management (MDM) solutions to meet organizational needs.
- Present and articulate architecture designs for MDM solutions to technical teams and stakeholders.
- Conduct comparative analysis of different MDM platforms, providing strategic recommendations aligned with business objectives.
- Collaborate closely with data governance, data quality, and business teams to define reference data standards.

- Develop and maintain scalable ETL/ELT workflows utilizing Python, Data Bricks, Azure Data Factory (ADF), Apache Airflow, and other tools.
- Integrate MDM solutions with data lakes, warehouses, and other analytical platforms like Snowflake.
- Design and implement data pipelines leveraging Kafka for real-time data integration.
- Ensure adherence to best practices in CI/CD pipelines for seamless deployment and version control.
- Proactively troubleshoot, optimize, and document data workflows.
- Maintain strong communication with technical teams, stakeholders, and project managers to ensure alignment and clarity.

Technical Skills & Qualifications:

- Proven experience (several implementations) in MDM projects, with preferable exposure in the financial/investment banking sector.
- Strong ability to architect and present comprehensive MDM solutions.
- Deep understanding of reference data management and governance.
- Expertise with MDM platform comparisons (e.g., Informatica, Reltio, Talend, or similar).
- Proficiency in Python, Data Bricks, Azure Data Factory, SQL, Kafka, Snowflake, and Apache Airflow.
- Familiarity with CI/CD tools and practices (Azure DevOps, Jenkins, etc.).
- Excellent problem-solving and analytical skills.
- Strong communication and stakeholder management skills.

Preferred Qualifications:

- Bachelor's or Master's degree in Computer Science, Data Engineering, or related field.
- Prior experience working in financial services, investment banking, or related domains.
- Certifications related to cloud platforms (Azure, AWS), Data Management, or MDM solutions.

Position 6

Role Name: Linux System Admin
 Location: SCOTSDALE, AZ (Onsite)
 Duration: 6 Months

Experience requested: 8-10

Description:

1. Experience in software development or technical support or operations experience.
2. Excellent troubleshooting, debugging and problem-solving skills.
3. Expertise in Linux System Administration.
4. Knowledge in Systems and multi-tier application and Network Troubleshooting.
5. Scripting languages (Python or JavaScript).
6. Expertise in CORE Java concepts and JavaScript.
7. Experience with load balancing principles (F5 Avi).
8. Familiarity with infrastructure cloud technologies (GCP, AWS, Azure) preferred.
9. Familiarity with configuration management and automation (e.g. Puppet, Ansible).
10. Experience with GitOps and OaC preferred. Demonstrable knowledge of Terraform, Jenkins, Artifactory, a strong plus.
11. Experience with managing incidents.
12. Strong verbal and written communication skills.
13. Experience handling Incident Management.

Position 7

Senior Salesforce Developer

- Location: Onsite — Hartford, CT
- Experience: 3–5 years

Job Summary

- We are seeking a Senior Salesforce Developer with 3–5 years of experience for an onsite role in Hartford, CT. The ideal candidate must have both the Salesforce Platform Developer I (PD1) and Agentforce Specialist certifications. You'll be responsible for designing and maintaining UI solutions using Lightning Web Components (LWC) and Aura Components. This role requires strong expertise in writing clean, efficient Apex code, managing triggers, and integrating Salesforce with external systems using REST APIs. Experience with Copado for deployments is also a key requirement.

Required Skills & Experience

- 3–5 years of hands-on experience as a Salesforce Developer/Admin.
- Mandatory certifications: Salesforce Platform Developer I (PD1) and Agentforce Specialist.
- Proficiency in Apex, SOQL, Visualforce Pages, and Workflow & Approvals.
- Experience with Lightning Web Components (LWC) and Aura Components.
- Experience in API integrations using REST integration patterns.
- Familiarity with Copado for managing deployments.
- Knowledge of Apex best practices, including identifying and resolving PMD rule violations.
- Experience with Salesforce automation processes like Flows and Process Builder.

Position: 8

Title: Training Lead Resource

Location: South, FL

Local Candidates only

- 5+ years of experience in training development and delivery for enterprise software implementations.
- Proven experience leading training efforts for large-scale IT projects, preferably in government or judicial environments.
- Strong understanding of adult learning principles and instructional design methodologies. Experience with case management systems or similar judicial/public sector applications. Proficiency in developing and delivering training using various modalities (in-person, virtual, e- learning).
- Strong project management and organizational skills, with the ability to manage multiple priorities. Excellent written and verbal communication skills, including the ability to communicate technical concepts to non-technical audiences.
- Proficiency with e-learning tools (e.g., Articulate Storyline, Adobe Captivate, Camtasia) and Learning Management Systems (LMS).
- Ability to work collaboratively with cross-functional teams, including IT, business units, and external vendors.
- referred:
- Experience with specific CCMS platforms (e.g., Tyler Odyssey, Journal Technologies, or equivalent). Familiarity with court operations, judicial workflows, and legal terminology.
- Experience conducting training needs assessments and user readiness evaluations.
- Knowledge of change management principles and experience supporting organizational change initiatives
- Experience developing accessible training materials in compliance with ADA and Section 508 standards.
- Certification in instructional design (e.g., ATD, CPTD), project management (e.g., PMP, PRINCE2), or training (e.g., Certified Professional in Training Management).
- Experience managing or mentoring a team of trainers or instructional designers.

Position: 9

Title: Junior Java Programmer with Python and C#

Location: South, FL

Local Candidates only

Minimum Skills Required

- Basic proficiency in programming languages such as SQL, Java, C#, or Python.
- Familiarity with relational databases (e.g., SQL Server, Oracle) and data querying. Strong analytical and problem-solving skills.

- Ability to work independently and as part of a team.
- Excellent communication and documentation skills.
- Familiarity with APIs, XML/JSON, and data integration tools.

Qualifications Required:

- Bachelor's degree in Computer Science, Information Systems, or a related field. Understanding of software development lifecycle (SDLC) and Agile methodologies.
- Experience with version control systems (e.g., Git) and issue tracking tools (e.g. Azure, JIRA) Strong analytical and problem-solving skills.
- Ability to work independently and as part of a team.
- Excellent communication and documentation skills.

Preferred:

- Experience with court systems, legal applications, or government IT projects.
- Exposure to case management systems (e.g., Tyler Odyssey, Journal Technologies).
- Familiarity with APIs, XML/JSON, and data integration tools.
- Work Environment:

Position: 10

Title: Java Architect

Location: Albany, NY

Description:

- 84 Months of experience in Object Oriented Analysis and Design (OOAD) in designing and implementing Information Technology Solutions using the Java programming language.
- 48 Months of experience in Oracle PL/SQL and developing procedures and packages.
- 36 Months of experience in using the Spring framework.
- 24 Months of experience in using the Struts framework.
- 24 Months of experience using JavaScript frameworks.
- 12 Months of experience building Responsive Web applications.
- 12 Months of experience developing Java Web Services (REST and SOAP.)

Position: 11

Title: Java Architect

Location: Albany, NY

Description:

- 84 Months of experience in Object Oriented Analysis and Design (OOAD) in designing and implementing Information Technology Solutions using the Java programming language.

- 48 Months of experience in Oracle PL/SQL and developing procedures and packages.
- 36 Months of experience in using the Spring framework.
- 24 Months of experience in using the Struts framework.
- 24 Months of experience using JavaScript frameworks.
- 12 Months of experience building Responsive Web applications.
- 12 Months of experience developing Java Web Services (REST and SOAP.)

Position: 12

Title: BizTalk Architect

Location: Albany, NY

Description:

- 48 months BizTalk Configuration/Deployment experience (BizTalk 2013 or later) in a multi-server environment.
- 84 months .NET experience (2.0 framework or later.)
- 84 months BizTalk Orchestration Programming experience (BizTalk 2013 or later.)
- 12 months BizTalk Pipeline Programming experience (BizTalk 2013 or later.)
- 48 months development/configuration experience with Business Activity Monitoring.
- 48 months WCF experience.
- 12 months Unit Testing experience using NUnit.
- 12 months GIT experience with TFS.
- 12 months BizTalk 2020 experience.

Position: 13

Title: .Net Developer with State Client Exp and SOAP

Location: Albany, NY

Description:

- 84 months experience developing and implementing multi-tier .NET applications leveraging [ASP.NET](#) (4.0 & above) MVC design pattern.
- 84 months experience with Service Oriented Architecture (SOA) application integration including development of secure .NET web-services using Windows Communication Foundation (WCF) and SOAP/Restful APIs.
- 84 months experience in Oracle designing relational databases, data modelling & deployment of SQL objects, PL/SQL coding and debugging, creating XML type stored procedures & packages, writing & testing complex SQL queries.
- 72 months experience designing, developing, and deploying .NET Core web applications using C# code

- 84 months experience in utilizing HTML5, AJAX, JavaScript, jQuery, Bootstrap and Cascading Style Sheet client-side technologies to build responsive user interfaces
- 72 months experience developing analytical and statistical reports using SQL Server Reporting Services (SSRS).
- Bachelor's degree - in Computer Science related field

Position: 14

Title: .Net Architect

Location: Albany, NY

Description:

- 84 months experience writing C# code in Visual Studio
- 48 months experience with .Net CORE
- 48 months experience writing MVC code in Visual Studio.
- 48 months of experience with JavaScript and JS Libraries
- 36 months experience writing and executing unit tests
- 60 months of experience in creating SQL queries
- 36 months experience with Source Control

Position: 15

Title: Power Builder Developer

Location: Albany, NY

Description:

- 84 months experience writing PowerBuilder Code.
- 24 months experience writing PowerBuilder Code, specifically using Version 10.5
- 48 months experience with databases, including designing Tables, Triggers, Stored Procedures and writing SQL.
- 60 months experience with gathering requirements and creating design documents.

Position: 16

Role: 1- Java Full Stack Lead

Location: Minneapolis, MN (Hybrid –Only local)

Need – 11 to 12 years profile

Job Description:

- We are seeking a seasoned Lead Full Stack Java AWS Developer with 12–15 years of strong development experience to lead design, development, and deployment of scalable applications in a cloud-native environment.

- Must-Have Skills:
- Core Java (including Java 17)
- TypeScript
- Microservices & REST API development
- AWS (Lambda, Code Pipeline, API Gateway, CloudWatch, DynamoDB, AWS CLI)
- Docker, Kubernetes
- Strong scripting experience
- Unit testing frameworks (Mockito)

Good to Have:

- Quarkus
- GraalVM

Position: 17

Role:- Cloud Infrastructure Site Reliability Engineer (SRE)

Duration:- Long Term Contract

Job Location:- Onsite (Alpharetta, GA or Berkeley Heights, NJ)

Job Description:

As a Cloud Infrastructure Site Reliability Engineer (SRE) with expertise in multiple public cloud service provider platforms, you will be responsible for operating infrastructure solutions, following the principles and practices pioneered by Google's SRE model. Your work will ensure our cloud services meet uptime, reliability, and performance targets, and you will drive automation and continuous improvement across our production environments. This role will involve collaborating with cross-functional teams to enhance our cloud reliability posture and streamline processes through automation.

Key Responsibilities:

- Design, build, and maintain highly available, scalable, and secure cloud infrastructure on platforms such as AWS, GCP, or Azure.
- Develop and implement automation for provisioning, monitoring, scaling, and incident response using Infrastructure-as-Code tools (e.g., Terraform, CloudFormation, Ansible).
- Monitor system reliability, capacity, and performance; proactively detect and address issues before they impact users.
- Respond to production incidents, participate in on-call rotations, and lead post-incident reviews to drive root cause analysis and reliability improvements.

- Collaborate with software engineering and security teams to ensure new services and features are production-ready and meet reliability standards.
- Build and maintain tools for deployment, monitoring, and operations; automate manual processes to reduce toil.
- Document operational processes and system architectures to ensure knowledge sharing and repeatability.
- Continuously evaluate and implement new technologies to improve system reliability, security, and efficiency.

Qualifications:

- Bachelor's degree in Computer Science, Engineering, or a related technical field, or equivalent practical experience.
- 3+ years of experience in software development with proficiency in at least one programming language (e.g., Python, Go, Java, C++).
- Experience administering cloud platforms (AWS, GCP, Azure), including networking, security, containerization, storage, data management, and serverless technologies.
- Solid understanding of Linux systems, networking fundamentals, virtualized, and distributed systems, file systems, system processes and configurations.
- Deep understanding of observability (monitoring, alerting, and logging) tools in cloud environments. Ability to set up and maintain monitoring dashboards, alerts, and logs.
- Familiarity with Continuous Integration/Continuous Deployment (CI/CD) tools for automated testing, deployments, provisioning, and observability.
- Ability to manage and respond to incidents, perform root cause analysis, and implement post-mortem reviews.
- Understanding of setting, monitoring, and maintaining Service-Level Objectives (SLOs) and Service-Level Agreements (SLAs) for system reliability. Additional Qualifications a Plus:
 - Experience working with enterprise-scale financial services or other regulated industries
 - 5+ years of experience in SRE, DevOps, infrastructure, or cloud engineering roles, preferably supporting large-scale, distributed systems.
 - Excellent problem-solving, troubleshooting, and communication skills.
 - Experience leading technical projects or mentoring junior engineers.
 - Certifications: Certified Engineer, DevOps, SRE, CSREF
